**Implementation of Voting System Audit Log Best Practices**

On June 1, 2010, the Secretary of State recommended the adoption of best practices for maintaining Voting System Audit Logs. ([CC/ROV Memorandum #10181.](#))

As the Secretary of State noted, the mitigations listed are not specific to each voting system. Further, the Secretary of State advises that they will require each voting system vendor to provide specific instructions for the implementation of the recommended practices in future revisions of the California Use Procedures.

The County's voting system vendor will review implementation of the best practices with election officials at an upcoming meeting.

The Registrar of Voters looks forward to working with voting system representatives and receiving the required specific instructions for review and inclusion in upcoming revisions of current procedures and policy.
