**Certification of the Results of the Public Logic and Accuracy Testing  
of the Voting System to be used in the June 2, 2009, City of Riverside  
Election**

On May 6, 2009, Public Logic and Accuracy Testing of the Accessible Voting Units, Optical Scanners, WinEDS and WinETP system were performed in the office of the Registrar of Voters. During the test, all possible combinations of ballots were cast on all Accessible Voting Units and Optech 400c Optical scanners. These votes were then tallied and compared against the expected result previously made available to the public at the start of the testing.

The comparison showed that the equipment performed with 100% accuracy.

Results are available for inspection at the Registrar of Voters Office.

Barbara Dunmore  
Registrar of Voters
